***Oath/Declaration***

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: the signature and date of execution for two of the inventors are missing.

***Specification***

2. The abstract of the disclosure is objected to because the abstract should be on a separate sheet. Correction is required. See MPEP § 608.01(b).

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Box et al.

Box et al. shows solenoid valves 26a-26c having flow positions; meters 24a-24c; switch 40 having multiple controlling positions; controls 32a-32c; and authorization receiving means discussed in column 3, lines 14-19.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kaehler et al., Finlayson, Taivalkoski et al. and Poleshuk et al. show other metering devices for fluid dispensers.
